PLEASE NOTE:

The information contained in this document was obtained from sources believed to be reliable and is based on technical information and experience currently available from members of the Compressed Gas Association, Inc. and others. However, the Association or its members, jointly or severally, make no guarantee of the results and assume no liability or responsibility in connection with the information or suggestions herein contained. Moreover, it should not be assumed that every acceptable commodity grade, test or safety procedure or method, precaution, equipment or device is contained within, or that abnormal or unusual circumstances may not warrant or suggest further requirements or additional procedure.

This document is subject to periodic review, and users are cautioned to obtain the latest edition. The Association invites comments and suggestions for consideration. In connection with such review, any such comments or suggestions will be fully reviewed by the Association after giving the party, upon request, a reasonable opportunity to be heard. Proposed changes may be submitted via the Internet at our web site, www.cganet.com.

This document should not be confused with federal, state, provincial, or municipal specifications or regulations; insurance requirements; or national safety codes. While the Association recommends reference to or use of this document by government agencies and others, this document is purely voluntary and not binding unless adopted by reference in regulations.

A listing of all publications, audiovisual programs, safety and technical bulletins, and safety posters is available via the Internet at our website at www.cganet.com. For more information contact CGA at Phone: 703-788-2700, ext. 799. E-mail: customerservice@cganet.com.

Work Item 11-025
Cylinder Specifications Committee

NOTE—Technical changes from the previous edition are underlined.

NOTE—Appendices A and B are for information only.

SIXTH EDITION: 2014
FIFTH EDITION: 2007
FOURTH EDITION: 2002
THIRD EDITION: 1994

Contents	Page
1 Introduction.....	1
2 Scope	1
3 Information to be recorded	2
3.1 Cylinder design description	2
3.2 Results of tests	3
4 Acceptable test results	3
5 Tests.....	3
5.1 Proof of mechanical strength of filler test	3
5.2 Flashback test	4
5.3 Impact stability test.....	6
5.4 Fire test.....	7
6 Chimney fire test method	7
7 Wood bonfire test method	17
7.1 Securing the cylinder.....	17
7.2 Bonfire design.....	17
7.3 Kerosene	17
7.4 Wind shield.....	17
7.5 Fire capabilities.....	17
8 Test procedure for chimney test and bonfire test	19
8.1 Testing.....	19
8.2 Retest	19
9 Acceptance criteria for chimney and bonfire tests.....	19
10 References	19

Table

Table 1—Minimum number of cylinders required for tests.....	3
---	---

Figures

Figure 1—Flashback test flash-block assembly for acetylene cylinders	5
Figure 2—Isometric view of fire test apparatus assembly.....	8
Figure 3—Chimney assembly	9
Figure 4—Base	9
Figure 5—Center assembly	10
Figure 6—Bottom wind deflector.....	10
Figure 7—Cylinder stand	11
Figure 8—Top assembly for 8 in (203 mm) diameter cylinders	11
Figure 9—Top assembly for 12 in (305 mm) diameter cylinders	12
Figure 10—Draft deflector for 8 in (203 mm) diameter cylinders	12
Figure 11—Draft deflector for 12 in (305 mm) diameter cylinders	13
Figure 12—Secondary wind deflector	13
Figure 13—Wheel-type burner unit with base and fire brick cylinder support installed (personnel protection frame surrounds unit)	14
Figure 14—Burner unit with bottom wind deflector installed	14
Figure 15—Spark igniter being installed through base	15
Figure 16—Bottom chimney section installed (blasting mats for personnel protection).....	15
Figure 17—Top chimney section with downdraft deflector installed	16
Figure 18—Lower insulation, two flue gas, and two cylinder surface thermocouples, spark igniter, and propane fuel line installed.....	16
Figure 19—Wood bonfire test—view of wood stack for 8 in (203 mm) cylinder—step 1	17
Figure 20—Wood bonfire test—view of wood stack for 8 in (203 mm) cylinder—step 2	18
Figure 21—Wood bonfire test—view of wood stack for 8 in (203 mm) cylinder—step 3.....	18

Appendices

Appendix A—Correlation of drop weight impact versus explosive charge (Informative)..... 21
Appendix B—Suggested burner and ignition system for chimney fire test burner specifications (Informative) .. 22
